8:00 AM – 5:00 PM - 2 Days -16 hours

Cost: FREE

SYNOPSIS

This course is designed to teach Law Enforcement Officers and other first responders how to treat and manage trauma patients in a civilian tactical environment. Utilizing a mix of classroom presentation and hands-on skills training, attendees will learn how to provide life-sustaining treatments in threatening conditions. Instructors will leverage overseas and domestic military experiences to illustrate and convey lessons learned in hostile situations. This course requires a 16-hour (2-day) commitment from students and provides more in-depth modules and hands-on skills practice than is offered in the Basic Tactical Medicine course. The second day includes evaluated scenarios that require students to practice tactics as well as life-saving treatment for casualties. Upon course completion, students will be able to identify and treat the leading causes of preventable death in a multi-phase tactical environment.

WRCTC Medical Cadre have over 50 years of Special Operations Forces (SOF) paramedic experience with multiple operational and combat deployments. The WRCTC provides all medical training supplies, high fidelity medical simulations, and high-quality A/V training support. All scenarios are tailored to the operational environment of course attendees to enable maximum training value for all students. Training is “agency agnostic” and mixed classes provide a tremendous opportunity for interagency coordination and exchange of best practices. Provides challenging realistic training to all skill levels.

REGISTRATION

Registration for this course is **Free**.
